

Full-cycle water solutions for resilient data center operations.

Protect mission-critical operations with smart water management.

Your trusted partner for the data center water lifecycle.

For high-performance data centers, cooling reliability is critical. Xylem delivers complete water lifecycle management — from planning and design through operation and maintenance. Our water, wastewater and reuse solutions, backed by expert service and support, help data centers improve efficiency, maximize uptime and strengthen long-term operational excellence.

Combining industry-leading water expertise with a comprehensive portfolio of proven technologies, Xylem is the trusted partner that can deliver fully integrated water solutions across the entire facility. We help data centers reduce complexity, improve performance and build the resilience needed to support sustainable growth.

Protect uptime, reduce operational risk

Ensure reliable cooling performance and resilient water systems.

- Proven technologies engineered for mission-critical environments
- Integrated solutions reduce complexity and points of failure
- Water quality and treatment expertise protects critical assets
- Responsive support minimizes disruptions and maintains performance

Accelerate deployment, simplify delivery

Meet aggressive growth timelines while reducing project risk.

- Single-partner accountability across the water cycle
- Expertise from feedwater assessment to wastewater management
- Integrated solutions simplify design, procurement and implementation
- Scalable technologies support future capacity needs

Optimize water performance and sustainability

Maximize water and energy efficiency while supporting sustainability goals.

- Water reuse solutions that reduce freshwater demand
- Advanced technologies that optimize performance and water consumption
- Strategies that support WUE and PUE sustainability goals

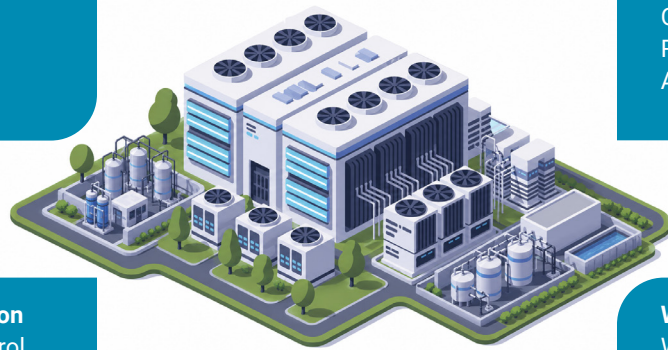

Integrated water solutions and services at every stage.

From feedwater to reuse, Xylem brings together the technologies, services and water expertise needed to manage the entire data center water lifecycle. Our integrated capabilities help simplify operations, improve cooling performance and support long-term resilience and growth.

Feedwater treatment

Clarification
Filtration
Softening
Reverse osmosis (RO)

Service & digital

Mobile solutions
Operating contracts
Remote monitoring
AQUA pro service support

Cooling water optimization

Scale and corrosion control
Biological control
Sidestream treatment (filtration, RO and deionization)
Water quality management

Wastewater & reuse

Wastewater treatment
Reuse systems
MLD & ZLD
Compliance support

Expert support across the project lifecycle

- Feedwater evaluation / wastewater treatability
- Engineering collaboration and design assistance
- Layout and site planning
- Timeline and project execution
- Commissioning and startup
- Training and operational handoff
- Full or limited operation and maintenance services

One trusted partner. Complete water lifecycle management.

Discover how Xylem can help you manage water across your entire data center. From planning and design to operation and optimization, we're committed to helping you improve efficiency, maximize uptime and build long-term operational resilience. Connect with one of our data center experts today.
