Bell & Gossett
xylem

End-to-end data center cooling innovation

Flexibility and efficiency for evolving industry needs

In today's increasingly complex data center environment, engaging an agile partner is as important as the solutions that keep your facility running. With a focus on holistic hydronic system design, Xylem's Bell & Gossett prioritizes community engagement and purposeful collaboration to develop sustainable, energy-efficient data centers.

Join us at AHR 2026 to see how we're reimagining the future of data center cooling through:

- A legacy of solution expertise
- Flexible, performance-oriented solutions
- Strong collaboration

Discover our innovative closed-loop liquid cooling systems, cutting-edge water treatment technologies and more.
