Safe Water for Kuyera Primary School

Water for Good

Kuyera Primary School needs a dependable source of safe water to support student health, attendance and daily hygiene.
Xylem Solution: Establish a tested groundwater source and prepare the site for a future solar-powered distribution system.

Impact: 1,248 students and staff

A Hospital-Grade Water System for Africa Mercy II

Mercy Ships

A new hospital ship requires a dependable potable water system to support surgical care and clinical operations for years to come.
Xylem Solution: Equip Africa Mercy II with a two-loop treatment and distribution system designed for potable and high-purity water needs.

Impact: 1,248 students and staff

Clean Water for Chogoria Hospital and Campus

CLEAN International

Chogoria Hospital, nearby schools and staff housing rely on river and well water with documented quality concerns.
Xylem Solution: Install a filtration system that improves year-round water quality for patients, students, staff and nearby residents.

Impact: Approximately 130,000 people

Rainwater for Moyo Primary School

Water is Life Kenya

Moyo Primary School has rainwater infrastructure, but undersized gutters and contamination reduce the reliability of stored water.
Xylem Solution: Upgrade collection, filtration and storage so students can access water at school instead of carrying it from distant sources.

Impact: Approximately 600 people

Bringing Water to the Eiti Maasai Community

Tawang'a Education

Severe water scarcity forces long journeys for water and disrupts children's education in the Eiti Maasai community.
Xylem Solution: Fund the engineering work needed to advance a community water system from a natural spring to the village.

Impact: 1,500 community members, including 350+ children

Safe Water and Health Care for Atomey

Global Partners in Hope

Rural communities around Atomey need dependable water access and locally available care for common health needs.
Xylem Solution: Support a clean-water network and a sustainable health center serving surrounding communities.

Impact: 18,000+ people

Water for Women-Led Farming in Madagascar

Asociación Agua Pura

The Tombontsoa Women's Cooperative faces a seven-to-nine-month dry season that limits food production and income.
Xylem Solution: Provide water storage, efficient irrigation, tools and training for a more resilient agricultural model.

Impact: 161 direct beneficiaries; potential 1,500 indirect

Building Water Leadership Across East Africa

Frank Water

Water security depends on professionals and institutions that can manage groundwater, watersheds and climate risks effectively.

Xylem Solution: Expand practical training, peer learning and a practitioner network for water leaders across the region.

Impact: 300 professionals; 5,000+ people through improved services

Connecting Communities Through Water Stories

H2Org

Water Stories makes water protection and microplastic pollution accessible through education, film, exhibitions and international exchange.
Xylem Solution: Support a six-month program of workshops, documentary storytelling, public learning and digital outreach.

Impact: 500+ direct; 5,000–15,000 digital reach

Safe Drinking Water for Frontline Schools in Ukraine

Yashchenko Foundation

Schools in war-affected communities need reliable drinking water despite damaged and disrupted local services.
Xylem Solution: Install point-of-use purification packages and train school staff to operate and maintain them.

Impact: At least 1,260 students and staff

Clean Drinking Water for Two Schools in India

Bhumi

Two government secondary schools in Tamil Nadu need reliable access to safe drinking water and stronger hygiene awareness.
Xylem Solution: Install and maintain reverse osmosis systems with the site infrastructure required for sustainable operation.

Impact: 926 students and teachers

Climate-Resilient Drinking Water for Taikkyi, Myanmar

World Vision International

Communities in Taikkyi face seasonal water scarcity and contamination as conflict and climate shocks strain local water systems.
Xylem Solution: Develop a tested, treated and community-managed groundwater supply for six villages.

Impact: 4,294 people across 568 households

Piped Water at Home for Families in Leyte, Philippines

Eau et Vie

Families in an underserved community in Leyte rely on water sources that are less convenient, less reliable or more expensive than household service.

Xylem Solution: Build a dedicated distribution network and connect approximately 150 households to affordable piped water.

Impact: More than 1,000 residents

Safe, Reliable Water for a Hospital in Gujarat, India

Shrimad Rajchandra Sarvamangal Hospital currently relies on untreated canal water, creating challenges for reliable water access across patient care areas, labs and other facilities.
Xylem Solution: This project will upgrade the hospital's water treatment, storage and distribution infrastructure to provide safer, more reliable water for patients, students, staff and visitors.

Impact: 2,900 + people

Rainwater for School Gardens in Argentina

Fundación Grupo Educativo María de Guadalupe

Colegio María de Guadalupe needs a sustainable way to irrigate school gardens while expanding hands-on environmental learning.
Xylem Solution: Create a rooftop rainwater harvesting and irrigation system supported by technical design, installation and education.

Impact: 450 children; 300+ families indirectly

Cleaner Wastewater for an Elder Care Home in Brazil

Casa dos Velhos Irmã Alice

The residential care home relies on a septic tank and needs a safer, more sustainable way to treat sanitary wastewater.
Xylem Solution: Install biodigesters that treat wastewater, reduce pollution entering the soil and lower groundwater contamination risk.

Impact: 45 residents and staff

Reusing Greywater for a Greener Community in Chile

Ingenieros Sin Fronteras Chile

Parcela 11 is completing a nature-based system that will reuse household and community-center greywater to irrigate a new public plaza.
Xylem Solution: Fund the remaining materials and technical adjustments needed to complete the treatment and irrigation system.

Impact: Approximately 1,300 residents

Ocean and Water Education for Communities in Chile

Centro Ballena Azul

Communities need accessible, science-based resources that connect water, marine ecosystems, biodiversity and conservation.
Xylem Solution: Create and distribute digital learning tools, workshops and outreach supported by volunteers and education partners.

Impact: At least 500 direct beneficiaries

Emergency Water and Hygiene Support in Colombia

World Vision Colombia

Families affected by the August 2026 earthquake need timely hygiene resources, safe-water education and protection support during early recovery.
Xylem Solution: Fund WASH activities in Cali, Pereira and Buenaventura during the first 90 days of response.
Impact: More than 500 people across 203 families

Safe Water for Rural Schools in Argentina

Fundación San Genaro

Five isolated rural schools in Santiago del Estero need stronger systems for water collection, storage and purification.
Xylem Solution: Improve school water infrastructure and reinforce health, hygiene and responsible water use throughout the school year.

Impact: 210 children and 130 families

A Community Rainwater Center for Xochimilco

Isla Urbana

Cristo Rey in San Gregorio Xochimilco needs a shared water solution that can also serve as an educational and community space.
Xylem Solution: Build a rainwater harvesting center with storage, treatment and opportunities for community and employee participation.

Impact: Approximately 350 people across 56 families

Piped Water for Families in Rural Chiapas

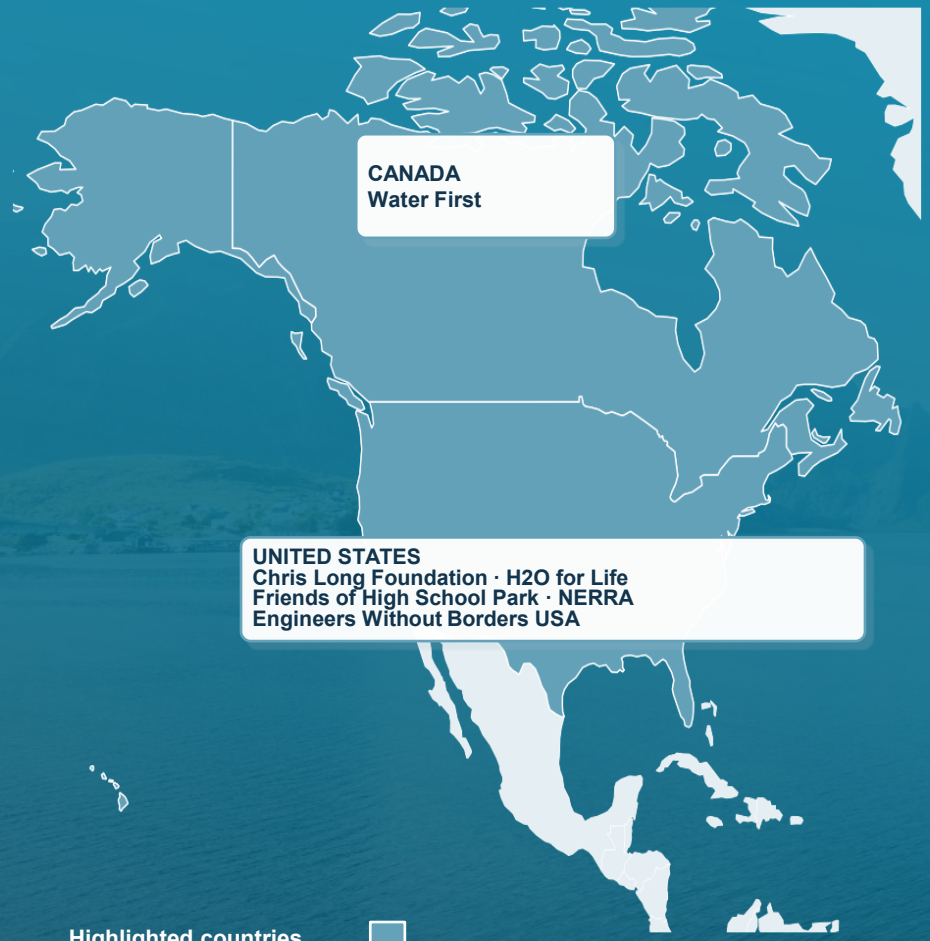

Fundación Cántaro Azul

Families in Santa Cruz El Recreo collect water from distant surface sources that may be contaminated.
Xylem Solution: Build a gravity-fed system that captures water from three sources and delivers it through household connections.

Impact: 143 current residents; capacity for 242

A Reliable Household Well for a Family in Virginia

Chris Long Foundation

A family in Willis, Virginia had a well that did not produce enough water for daily household needs.
Xylem Solution: Support the drilling work that restored access to clean drinking water at home.

Impact: One household

Student-Led Water Projects in U.S. Schools

H2O for Life

Financial barriers can prevent classrooms from joining service-learning projects focused on water, sanitation and hygiene.

Xylem Solution: Expand mini-grants that help students design projects and support global partner schools and communities.

Impact: 20 schools; 15 additional low-income students

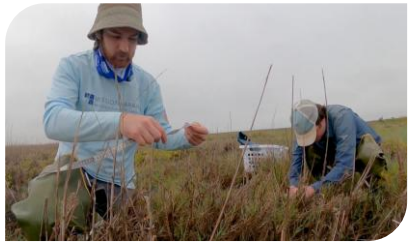

An Outdoor Watershed Classroom in Pennsylvania

Friends of High School Park

High School Park needs a dedicated public space for hands-on learning about Tookany Creek, native habitats and watershed stewardship.

Xylem Solution: Create an accessible outdoor classroom with seating, signage, native planting and community programming.

Impact: 100–200 students and 500+ annual visitors

Protecting Estuaries Through Science and Education

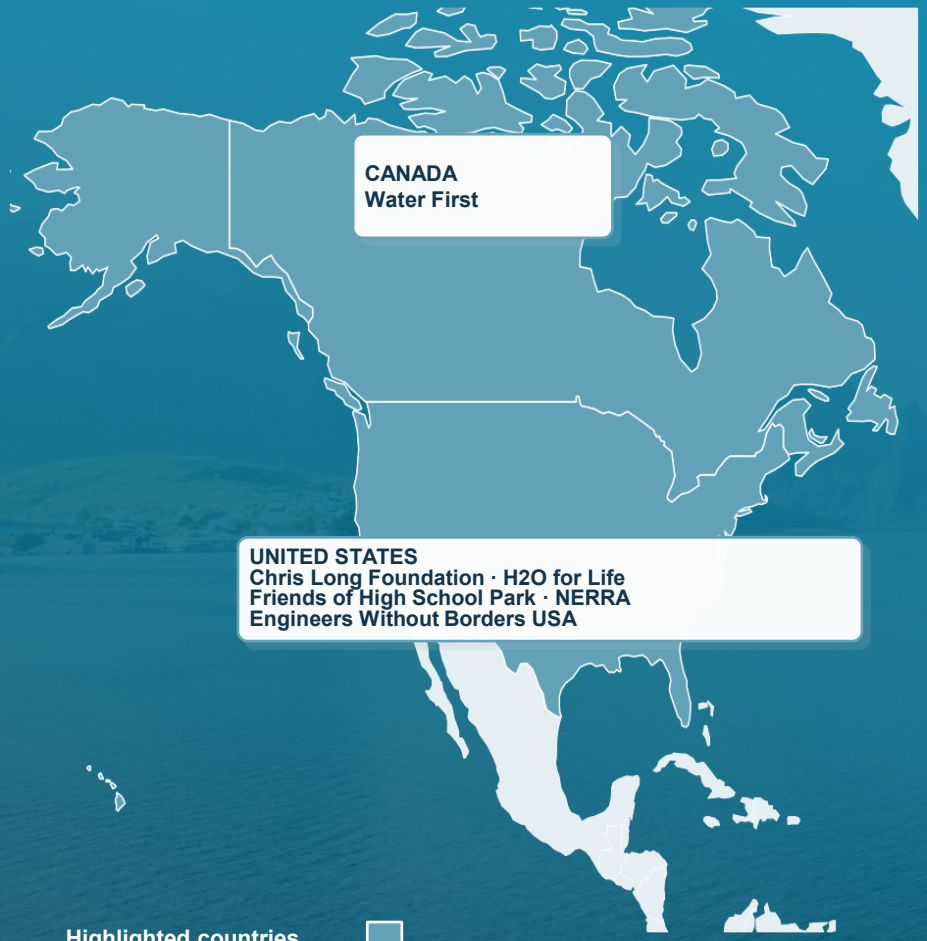

National Estuarine Research Reserve Association (NERRA)

Thirty coastal reserves collect water-quality data and help communities understand changing estuary conditions.
Xylem Solution: Support National Estuaries Week outreach and the wider network's science, education and stewardship work.

Impact: 4,400+ event participants

North America
