

We are excited to announce that the HYPACK 2027 Training Event will take place January 11–14, 2027 at the beautiful [Paradise Point Resort & Spa](#) in San Diego, California!

Elevate your skills at our annual hydrographic and dredging training event! This multi-day program is designed to equip you with the tools and knowledge needed to work efficiently and confidently, while staying up to date with the latest industry advancements that give you a competitive edge in the field. We are especially excited about this year's waterfront location, which is ideal for live, on-the-water boat demonstrations!

The event also provides an excellent opportunity to connect with industry-leading companies in our fully featured exhibit hall, offering valuable networking opportunities with professionals from across the hydrographic and dredging community.

Whether you want to explore the powerful tools from HYPACK for collecting and processing single beam, multibeam, LiDAR, geophysical, and environmental data—or you're looking for complete dredging solutions with DREDGEPACK®—you won't want to miss this opportunity to see how our solutions can help you successfully complete your projects!

Throughout the event, participants will receive instruction on the newest features in HYPACK® 2027, discover new products, and take part in comprehensive training sessions designed for both novice and experienced users across HYPACK®, HYSWEEP®, and DREDGEPACK® software.

Save the date and join us at the annual HYPACK Training Event—registration opens this summer. We look forward to seeing you there!
