

xylem

Complex engineered solutions from a single source

At Xylem we rent out more than just pumps and treatment systems. We offer world-class expertise to provide you with cost-effective, reliable and innovative full-service solutions for even the most complex applications. Careful preparation makes all the difference: the professional pre-assembly of your rented system by our experts saves you both time and money. Systems and components from Xylem are always tailor-made to meet your individual requirements.

This makes for increased operational safety and guarantees that the technology always works under optimal conditions.

Pumps from A to Z

We offer a wide range of pumps – from submersible wastewater and well pumps, designed for reliable and efficient pumping of clean water or highly abrasive media, to fully automatic self-priming pumps, available in diesel or electric drive, for temporary applications.

Ozone oxidation systems

We offer containerized, complete ozone systems for water treatment applications. The containerized design enables integration into the required process step with a minimal footprint and easy maintenance.

Dissolved Air Flootation (DAF)

Our RT Rental DAF systems are specifically engineered to efficiently remove TSS, BOD, and FOG from wastewater streams. The pre-assembled, skid, or containerised DAF systems ensure fast setup, with 24/7 nationwide support for rapid response.

Design & Installation

Our services range from feasibility analyses and environmental impact studies to technical design, dimensioning, and specification. To help you maximize efficiency and achieve peak performance from day one, our teams can provide professional installation and system startup.

Aeration systems

When breakdowns occur in treatment processes, emergency aeration units provide a quick and reliable solution while repairs are carried out. Blowers from our rental fleet deliver high energy efficiency and scalable performance.

UV disinfection systems

Our family of containerized UV disinfection systems is engineered to provide plug-and-play capability for water disinfection across a wide range of industrial and municipal applications.

Mechanical accessories

From check valves to water meters and piping, we have a large inventory of rental equipment and accessories to help you run your projects reliably and safely. The certified accessories are first class equipment for all our premium products.

Operation & Maintenance

We offer safe, efficient, and reliable end-to-end management of temporary water and wastewater systems, maximizing uptime and supporting our customers. We remotely monitor and control your system 24/7, while our extensive regional service network guarantees fast assistance whenever it is required.
