

**DREDGEPACK® - The Business Intelligence Toolkit for Dredging**

Learn how these improvements are designed to make analyzing dredging information faster and more efficient!

**ON-DEMAND WEBINAR**

The thumbnail features a play button icon over a background of data charts and a stack of blue folders, representing business intelligence and data management in dredging.

You can still watch and share the recording of our webinar: **“DREDGEPACK® The Business Intelligence Toolkit for Dredging”**. Just click the link below to get started!

In this recorded session, **Thelen Pumford** from the HYPACK Technical Support Team, and **Carlos Tejada**, our HYPACK Global Sales Manager, will guide you through our new product **HYPACK® LINK** and **new reporting tools within DREDGEPACK®**. With these new features, HYPACK® evolves beyond a tool designed solely for operators and becomes a comprehensive solution for **dredge engineers, dredge managers, and project stakeholders**, enabling improved visibility, streamlined reporting, and more informed decision-making across the entire dredging operation.

Follow along to see how these innovations can enhance efficiency, strengthen collaboration, and deliver greater value throughout your dredging projects.
