SPARK

User guide

September 2026

SPARK website

You can open it at URL: spark.xylem.com

SPARK is Xylem web site for **spare part selection** of Lowara and Goulds Water Technology brand.

It can adapt to the dimension of your screen, although it's best viewed at a resolution of 1680 x 1050.

It's very fast and user friendly.

Common elements of web pages

All the web pages share four common elements:

1. Title bar
2. Menu bar
3. Body, containing all the information specific to the page
4. Footer

Type

Family

Item code: if you know the item code you are looking for, you can write it in this text box. The item code can also be a partial string. In this case you can choose how to treat the string by selecting the desired option in the drop-down list on the left of the text box.

Contains: the list will show the item codes that contain the string written in the text box. For example, “Contains” and “E” selects “13274R00E“, “50002PE00 “ and “E501010AA.

Starts with: the list will show the item codes that start with the string written in the text box. For example, “Starts with” and “E” selects only “E501010AA.

Ends with: the list will show the item codes that end with the string written in the text. For example, “Ends with” and “E” selects only “13274R00E.

If your filter has extracted a lot of finished goods, you can page or scroll up or down to navigate the list.

Find a product and retrieve its spare parts

Search results section

To see the list of spare parts for an item, click the icon on the right of the line. This icon can have two different aspects:

-  Shows the pdf with the list of spare parts
-  Shows a web page with the list of spare parts as explained in the chapter "Spare part list"

The reason of this different behavior is that before we created this website based on a database, the spare part lists were handled in pdf files. The migration from the pdf version to the database takes time, so we decided to offer you the opportunity to immediately take advantage of the new search options by creating a webpage able to work contemporarily with the old spare part pdf as well as with the new presentation method based on tables.

As we move forward with the migration, the presence of the pdf icon – and thus of the spare part pdf – will decrease till it will disappear completely.

Spare part lists

When you click the icon for spare part list  on the “Find a product and retrieve its spare parts” web page, you are redirected to the related page that shows the drawing and the list of spare parts for the selected finished good.

The number on the drawing corresponds to the number of the spare part code in the list. You can zoom in and out the picture.

The white lines are for the standard version of the product. Lines with a yellow background contain information about the standard options, described in the column «Description of special».

If the spare part is recommended it will have an «X» on the column «Recommended».

Clicking on the pdf icon  will bring up a pdf version.

If a spare part has its own spare part list, as in the case of a motor, you'll be able to click an icon  on the right to open the list.

Multipack spare part lists

A multipack contains several identical spare parts in a single box, such as mechanical seals, diffusers or impellers.

To identify the multipacks available:

1. Enter **KL** in the Item code field.
2. Enter **PCS** in the Product description field.
3. Select **Search**.
4. Check the number shown immediately before PCS in the product description. This number indicates how many components are included in one box.

Example: KIT SEAL D14 VBE CEA 10PCS = one box containing 10 identical seals D14 VBE for CEA pump model.

Send a feedback

A feedback form interface. At the top, there is a label 'Name or email' above a text input field. To the right of the input field is a teal 'Send' button. Below the input field is a label 'Feedback' above a large, empty text area for writing the message.

Name or email

Send

Feedback

Through this page, you can send us a feedback about the web site. We'll record all the messages and evaluate them but won't necessarily answer your message directly.

Please use this page to send only feedbacks related to technical aspects of the web site – i.e. missing features, bugs, errors in spare part data – and not to ask for information related to missing item codes or similar business requests.

Name or email: this field is optional. If you provide this information, we'll be able to reach you in case we need further explanation. We won't use your name or email for any commercial purpose, nor will we share it with any third-party entity. If you enter this info, it will be remembered the next time you send feedback.

Feedback: insert your message in this text box.

When you click send, the message will be recorded in our database and you'll receive a confirmation message on your screen.

Thank You
