

NEW PRODUCT RELEASE!

HYPACK® LINK

Stop Managing Dredging Blind. Start Leading With Real-Time Intelligence.

Production inefficiencies. Fuel waste. Delayed reports. Reactive decision-making.
THAT ENDS NOW!

HYPACK® LINK is the next evolution in dredging intelligence—built to connect your vessels, your office, and your executive team through one powerful, real-time decision platform. This is not just data collection, this is operational control. Every minute your dredge operates without clear, real-time visibility is costing you money, so let HYPACK® LINK help solve that problem.

Field-to-Office Dredging Intelligence Software

Real-Time Visibility. Anywhere. On Any Device.

HYPACK® LINK pushes organized data to the cloud automatically—delivering live operational dashboards to your team wherever they are.

From vessel operators to executive leadership, everyone works from the same secure, role-based source of truth.

- No more waiting for reports.
- No more guessing progress.
- No more disconnect between shore and ship.

Just immediate, actionable intelligence.

ACT NOW!!

Be among the first to deploy the most advanced field-to-office dredging intelligence platform available.

- Contact sales@hypack.com today
- Schedule a live demo
- Add HYPACK® LINK to your operations

Stop reacting. Start optimizing.
